### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 15 December 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Applicant is required to elect between the species of a burner with a single cylindrical diffuser (Figure 2), a burner with a double cylindrical diffuser (Figure 3), a burner with a flat rectangular surface (Figure 5), or a burner with triangular diffuser plates on a cylindrical burner (Figure 50). Applicant is then required to elect a single subspecies of one of the Figures 1-60 illustrating a corresponding diffuser plate structure. The examiner counts over 20 different, mutually exclusive, embodiments of diffuser plates. Applicant is required to elect one embodiment of a diffuser plate, and indicate which of Figures 1-60 illustrates the corresponding structure.

Applicant is required, in reply to this action, to elect a single species (of one burner shape/structure) and subspecies (a corresponding diffuser plate structure) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The following claim(s) are generic: claim 60.
3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: sole independent claim 60 contains only material which is known in the prior art, and does not include a special technical feature. Claim 60 claims only features that are disclosed in the prior art, for example EP (0774623), cited on applicant's IDS. EP 0774623 discloses in Figure 2, for example, multiple diffuser elements located adjacent to each other. The examiner considers the plates to be capable of expanding at least in an outward direction, meeting the claimed limitation of "free to expand in at least one direction".
4. The special technical feature of the species and subspecies are mutually exclusive, and vary with each embodiment. For example, claim 83 recites a rest element that is a tab, while claim 84 recites a rest element that is a recess. Claims 95-99 recite various mutually exclusive configurations for the diffuser openings.
